EP '125 teaches the claimed invention including the structure of a working cylinder 61, a piston generally at 59, an actuation chamber generally above the piston and supplied with hydraulic fluid from line 81/66, a return chamber below the piston which can be supplied a gaseous medium if desired, an accumulator at 60 and a force transmitting device generally at 3/4/55.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
